

# Disabling Java Automatic Updates

To disable automatic updates for Java, do the following:

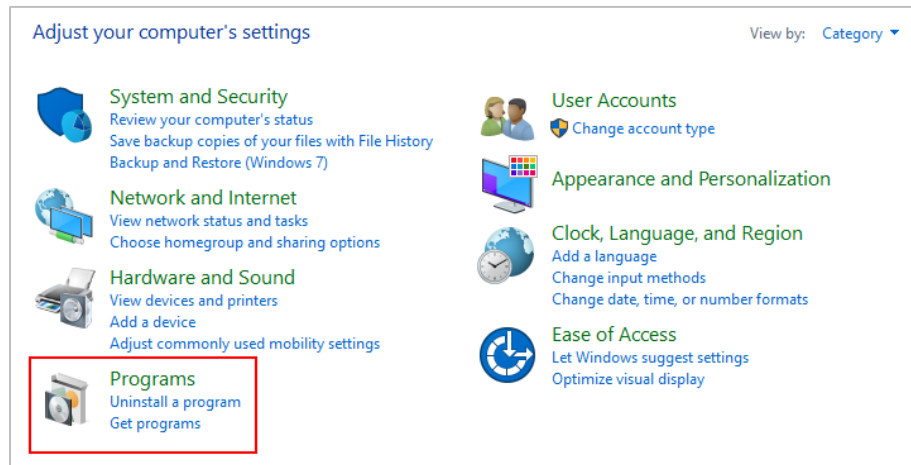

1. Open Control Panel in Windows and select Java from the list of Control Panel items.

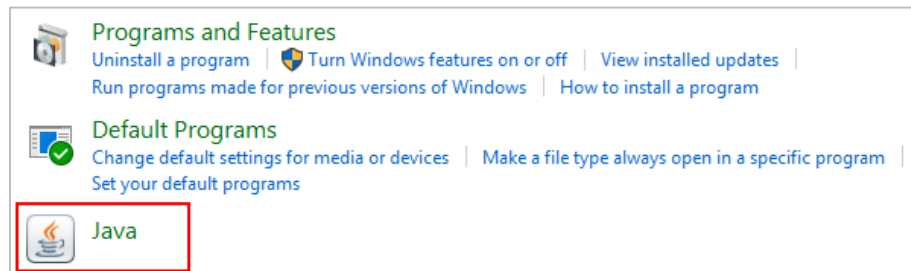

OR

If you see Categories, do the following:

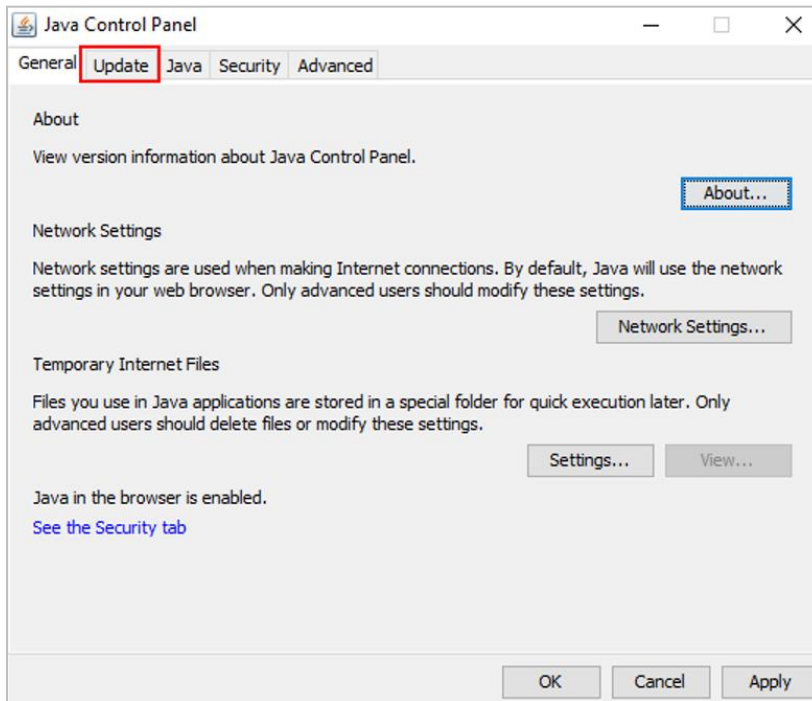

- a. Select Programs.

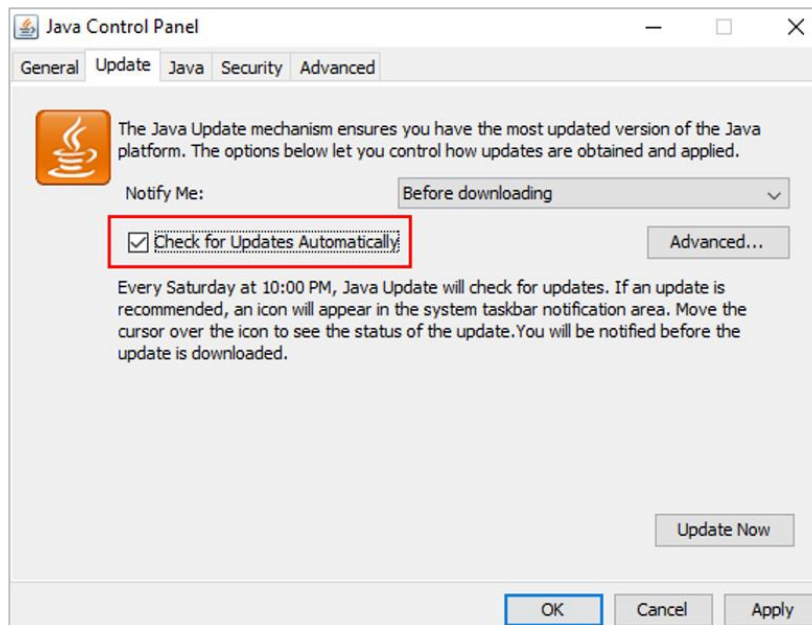

- b. Select Java.

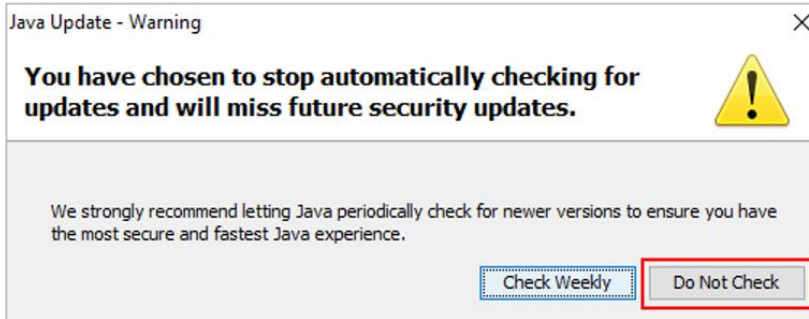

2. In the Java Control Panel select the Update tab.

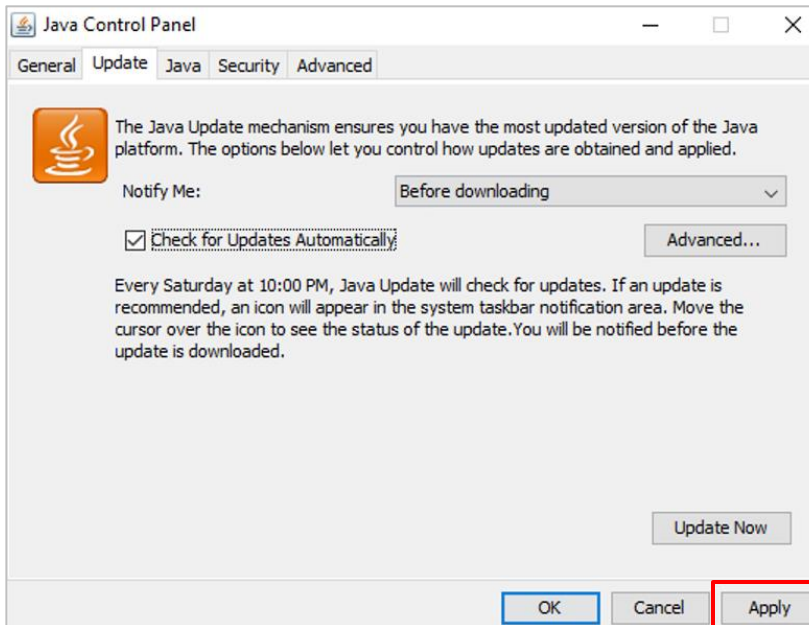

3. In the Update tab, clear the check box next to “Check for Updates Automatically.”

4. A Java Update warning appears. Click “Do Not Check”.

5. Click Apply to apply the change.

6. Click OK to exit the Java Control Panel.
